

2025 Ozaukee County Farm Equipment for Rent

Check out the available equipment below and how each implement can be utilized to fit your needs while saving your soil!

InterSeeder/No-Till Drill

Price: \$18/acre

Details: Converts from 7.5 inch no-till drill to interseeder that plants 3 rows between 30" row corn. Price includes tractor, planter & driver. 18' wide.

Uses:

- No-till drill for various cover crops or small grains
- Interseed into corn grain that is already established
- Add feed value when interseeding into corn silage

Airseeder

Price: \$10/acre

Details: Hydraulic fan powered and ground driven, requires power source hook-up in cab on your tractor, includes staff member for calibration and setup. 60' boom.

Uses:

- More efficient seeding due to size and air flow
- Excellent for seeding small grain, like wheat, rye, alfalfa, clovers and grasses
- Useful during late winter to frost seed large areas

Crimper

Price: \$7/acre

Details: 16-inch rolling drum, 3-point hitch attachment for front mounted use or tow behind, and can add water to increase weight. 15.5' wide

Uses:

- Terminate cover crop
- Herbicide free option to reduce herbicide resistance
- Good for providing mulch layer to reduce hot soil surface temps, create more uniform soil temp, and conserve soil moisture
